

stockbroking

*Efficient and reliable execution-only dealing on local
and international stockmarkets in almost all major
currencies is only a phone call away.*

stockbroking

Our principle service offering is execution-only stockbroking, both on the local as well as on the international markets. We deal directly on behalf of a large number of clients on the Malta Stock Exchange and have excellent arrangements in place with third party correspondents for fast and efficient international stockbroking covering most stockmarkets worldwide. We deal as agents in global bonds, shares, ETF's and selective funds in almost all major currencies.

From a local perspective, we have a leading market share in equity dealings on the Malta Stock Exchange. We are in fact the largest privately-owned independent brokerage house and are involved in one of every three equity transactions executed through the Malta Stock Exchange. Our extensive client base also enables us to participate as one of the main intermediaries in many of the local IPO's and new bond offerings by companies tapping the market. We believe this is a result of our commitment to providing clients with

timely investment recommendations on all new equity and bond offerings. Our Research Team also closely follows developments within the various listed companies and provide equity and bond updates to clients regularly.

Our stockbroking service is suitable for all clients who wish to have an active involvement in investment matters and receive notice from us confirming the execution of a transaction on their behalf shortly after the trade has been effected.

Dealing instructions can be made either by telephone, via email or in writing. During official market hours, we are able to confirm the execution of a transaction almost real-time.

Your investment consultant at RFC will be pleased to exchange views and keep you informed of market developments and new opportunities if you so require.

the main features of this service include:

- Retention of control over investments
- Flexibility with respect to choice of investment instruments
- Easy and quick access to international stockmarkets
- Access to all our local market research and information
- Access to foreign research through reputable foreign investment houses
- Comprehensive reporting
- No minimum investment requirement
- Management of assets on a nominee basis (optional but recommendable)

Please refer to our Stockbroking Fees within the appropriate appendix of our 'General Client Agreement' or to the brokerage fact sheet available on request.
